

ADONIS

Flat Panel Digital X-Ray

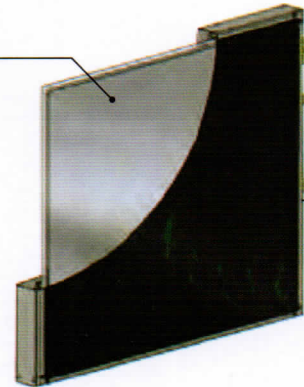

High Definition X-Ray Imaging

- Large Imaging Area of 43 x 43cm (17" x 17")
- Best Image Quality
- User Friendly Software Tool

Fast solution for high performance FPD development

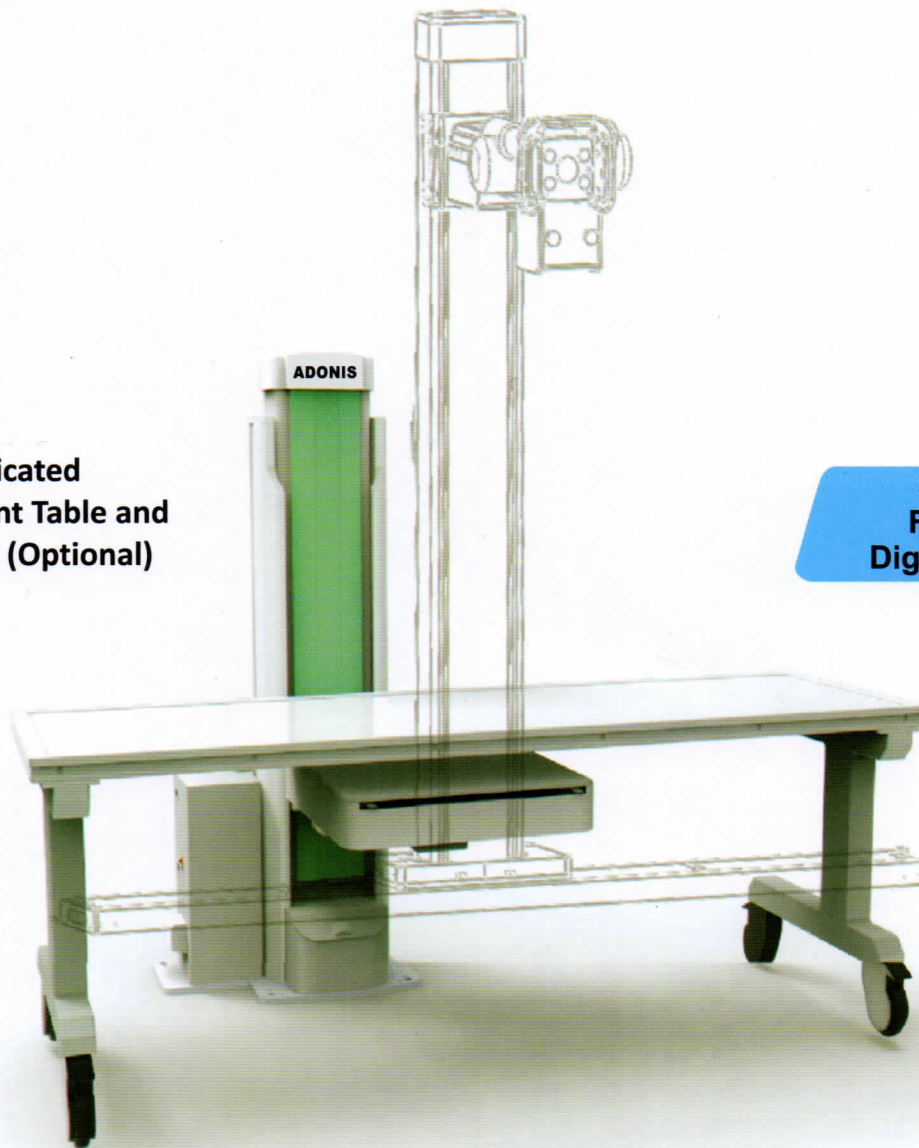

- TFT panel with a-Si Photodiode and sealed CsI/Tl scintillator using Quadcel technology.
- Unparalleled image quality, allowing reduction of the radiation dose with your own FPD.
- Most favorable pixel size simultaneously achieve high sensitivity and high resolution.

TFT Panel with CsI
(=Quadcel module)

Complete FPD

**A Fully Sophisticated
Patented Patient Table and
Detector Stand (Optional)**

**True
Flat Panel
