

## Image Processing And Storage

Dedicated Video Pipe Line Processor based Digital Imaging System  
Produces the Dynamic Image Quality for the specialists to achieve their desired results and enable them to take their decisions faster.

### Advanced GX Image Processing

- Windows based 64 bit Image Storage and Processing
- Auto Image Capturing
- Real Time and Post Processing with Pan & Zoom Control
- Complete Patient Data Base
- Large Data Storage (More than 50000 Frames)

### Useful Image Control

Averaging, Flip, Mirror, Negative, Rotate, Zoom, Brightness & Contrast Enhancement, Grey Scale adjustment, Calibration, Noise Filtrations, Edge Enhancement, Image Flip, Image Rotation 360 Deg

### Unique Functions

- ADONIS Unique RAPIDS software with independent settings for Otho, Uro Neuro and User Defined settings.
- Cordless Remote for Image Memory and Processing Operations.
- Printing of Images in different formats on simple paper.
