

UV Sanitization

A Safe And Evolving Workplace

Healthy Standee

Healthy Standee addresses all 3 sources of indoor air pollution (particles, aerosols and odors). The key to the system is Ultra- Violet Germicidal that destroys viruses, bacteria and volatile organic compounds (VOC) in addition to particulate filtration within the air purifier.

Typical Room Air Contaminant Reduction

- Particles down-to 15 microns
- Viruses and Bacteria
- Volatile Organic Compounds (VOC)
- Effectively kills virus and bacteria.
- Safe to use in OFFICES, CLINICS, HOSPITALS and HOMES.
- Extra dosage of UV-C Germicidal for fast purification.
- Strong after sales services and availability of spares.

Handy Standee

Handy Standee is a mobile device for flexible use for air and surface disinfection. This device is developed as a supplement to standard cleaning in rooms where no personnel are present.

Typical Room Air Contaminant Reduction

- Produces no ozone or other secondary contaminants
- No additional chemicals necessary
- No waste is generated
- Effectively kills virus and bacteria.
- Safe to use in OFFICES, CLINICS, HOSPITALS and HOMES.
- Extra dosage of UV-C Germicidal for fast purification. Optimum and compact size for storing and mobility.
- Strong after sales services and availability of spares.
- Tested and verified by NABL ISO/ IEC 17025 accredited Lab.
- Sturdy material used for durability.
- Product designed to achieve 360° germicidal irradiation.

UV ROBO Truck

UVC RoboTruk, a sterilization lamp for big spaces with radar induction for human safety. It has a wireless remote control for you to operate the trunk from a safe distance, with 30 secs auto-delay.

Remote control and Timer

Most of our products comes with a remote control to operate the UVC lamp from a distance to avoid contact with humans. And you can also set timer to move out of the room before the sterilisation process starts.
