Introducing HP-150 V2 Communication System

The all new HP-150 V2 Communication System leads the way in combining today's most wanted features with the ultimate ease of operation. The result is a stylish, multi-functional, communications system that will give your business a decisive competitive advantage.

HP-150 V2 Communication System

Big performance for Small & Medium Businesses (SMB)

Reliable voice communication using high-quality devices those are extremely simple to operate - that's what **HP-150 V2** is all about. Specially designed for companies with up to 50 employees, this communication system is built on tried and tested analog and ISDN technology, even allowing mixed mode operation. With a wide range of integrated solutions it is capable of fulfilling the most sophisticated requirements.

This system provides professional support for small business operations, hotels, production house, lawyer offices, doctor's clinic and any other work situations where employees rely heavily on communications to carry out their day-to-day activities. It offers features normally found only in much larger systems.

Schematic of HP-150 V2 System

HP-150 V2 Communication System uses high speed CPU to handle high traffic loads. The system is flexible enough so that you can build the possible combination of trunks, analog phones and digital phones to suite your organizational requirement. The HP-150 V2 system also supports ISDN PRI (30 Ch.) interface which is a standard connectivity offered by telecom service providers for SMB customers.

Features supported by HP-150 V2 Key Telephone System

▶ Voice Paging (Broadcast):

Voice Paging enables broadcasting of announcements to digital phones in the system. Any extension (Analog/Digital) can broadcast the message by pressing a specific code to activate the speaker of Digital phone. Group broadcast is also possible with any number of digital phones in that particular group.

▶ Extension Name display on Digital phone:

Name display (14 Characters) is supported on digital phone (8150/8180/8230). With this any internal extension can be assigned a name & the same would be displayed.

▶ Flexible feature codes:

It is possible to assign flexible codes for features like Call Back, Call Pick up, Conference, DND, Override, Trunk Access etc. The code can be single digit to upto 3 digits.

▶ System Speed dial:

HP-150 V2 supports system speed dial. The frequently dialed numbers can be stored centrally in the system speed dial list. Every number is then represented by a speed dial number which is used instead of the full phone number.

These numbers can then be dialed out by any extension by dialing the short code.

System can store maximum 496 speed dial numbers centrally.

▶ Personal Speed dial:

Individual Speed Dial enables every subscriber to store 16 external numbers as individual speed dial numbers in addition to the system speed dial numbers

▶ Automatic Day-Night service:

HP-150 V2 supports Automatic Day/Night service. This feature enables day/night settings to be activated at predefined time intervals. Features like incoming call handling & Class of service are also switched accordingly.

▶ Linear and Cyclic Seizure of Trunk Lines:

Linear or cyclic seizure of trunks is now supported.

▶ Hunt Group Timer:

HP-150 V2 now supports more flexibility in terms of timer settings for hunting groups. The timers can be configured in steps of 5 seconds compared to the earlier steps of 15 seconds.

▶ Hot-Line:

Hotline feature has been improved now with HP-150 V2. Both types i.e Immediate & Delayed Hotlines are supported.

▶ Call Transfer (Supervised):

Call transfer (Supervised) feature has been improved. During a supervised call transfer, it is now possible to take back the original call in case the called extension doesn't answer.

▶ Call Hold Feature (for Digital phones only):

Call Hold feature has been improved in HP-150 V2. The hold timer is increased from 120 seconds to 300 seconds. Using this feature a digital extension user can press the hold key to put an existing call on hold, upon expiry of the timer (300 seconds) call will be recalled to the digital extension.

▶ Flexibility of handling Incoming Calls :

System supports 3 types of answer mode when called from PSTN trunklines.

- **Dialing desired extension directly (Voice guided DID):** The caller from CO-line will hear guiding voice when he calls the system, then he dials extension number directly as desired after hearing mentioned voice.

• Operator assisted call transfer:

Call will land by default on the Operator Console device like Digital Phone 8150/8180/8230. Then the operator can transfer the call to the desired extension.

• Group ringing:

System supports max. 5 extensions in a group simultaneously when there is an incoming call from CO-line. Any one of the extension out of group can answer the call. Other extensions will stop ringing once the call is answered.

▶ Conference calls :

HP-150 V2 system supports 8 party conference features. Operator can set the conference call and needs to be part of the conference during the call. Conference call is automatically closed when all the participants exit the call.

- **Caller Line Identification:** HP-150 V2 system supports internal as well as external line caller ID on Digital Phone 8150/8180/8230 as well as analog CLI phones with DTMF / FSK formats.

- **Calling time restricted:** System can restrict when extension has a long time calls with internal and external lines.

- **Hot-line:** System supports when extension has hot-line function to internal extension or an external number when operator picks up and no digit is dialed.

- **Flexible numbering:** HP-150 V2 system supports flexible numbering scheme up to 8 digits. You decide the numbering plan that suits your organization.

- **Do not disturb (DND):** Someone may not like to be disturbed by others, so he can set DND function.

- **Phone Mate Service:** Parallel ringing solution for extension & mobile phone. Each extension can have one mobile number as it's mate. Ring signal will be sent simultaneity to both devices. Any one of them answers the call, the other one stops ringing.

- **Call Hunting:** An incoming call can be automatically hunted amongst multiple extensions programmed in the hunt group. The external caller will always have somebody to attend his call.
